# Jaishankar bats for collective good in AI governance

**NEW DELHI, DHNS:** The global governance of Artificial Intelligence (AI) must confront the temptation of a few nations to put self-interest above collective good, External Affairs Minister S Jaishankar said.

Jaishankar underlined the concerns about bias, ethics, privacy, and vulnerability arising out of the new frontier of technology and noted that 'trust and safety' were 'essential for the implementation of responsible AI'.

Jaishankar was speaking at the Trust and Safety India Festival 2025, which is one of the preludes to the AI Impact Summit, which Prime Minister Narendra Modi will host in February 2026.

"Technology is a force for good, but only if humanity guides it," Jaishankar quoted Modi saying.

While the US launched its AI Action Plan on July 23, China released its Action Plan for Global Artificial Intelligence Governance just three days later. President Donald Trump's administration focused on expanding the AI capabilities of the US and lessening regulations. The Chinese government, on the other hand, focused on expanding its influence in building the global AI governance architecture.

"The different societies have put different levels of emphasis on the benefits and risks of AI... But at the end of the day, it is imperative that we take a sober and balanced view," he said.

"After all, concerns about bias, ethics, privacy and vulnerability are well-founded, deriving from pre-existing experiences. We also need to take particular precautions against the danger of losing trust in institutions."

# EAM calls for implementation of 'Responsible AI'

**ASHOK TUTEJA**
*New Delhi, 7 October*

External Affairs Minister S Jaishankar on Tuesday observed that trust and safety are essential for the implementation of "Responsible AI" and underlined that for a society like India, this means the development of indigenous tools and frameworks, self-assessment protocols for innovators, and establishing relevant guidelines.

"Only then can we be assured that the development, deployment, use, and governance of AI is safe and accessible," he said in remarks at the "Trust & Safety India Festival 2025".

The minister said India bears a special responsibility because many other nations – especially those of the Global South – they look to the country for inspiration.

"Certainly in the case of the digital public infrastructure, today what we have achieved in the last decade, if you see today the scale of delivery, the improvement in governance, the efficiencies with which we serve the public, I think it is already resonating across the world," he said.

Talking about the future, the EAM said AI will transform economies in the next few years, change our work habits, create new health solutions, enhance educational access, improve efficiencies, and could even lead to a new lifestyle.

'"The difference with the past is that this particular transformation that is going to come upon us – this will be all-pervasive and not just sectoral. It will impact every citizen in every corner of the world. New efficiencies and new possibilities will certainly emerge, but so too will new players and new power centres," he added.

For this very reason, he said the global community needs to adopt a balanced approach to the governance of AI and to ensure that there are adequate guardrails in place to protect digital nagriks. He quoted PM Modi in this regard to say: "Technology is a force for good, but only if humanity guides it."

"Indeed, every time a game-changing technology has appeared on the horizon, it has triggered off similar endeavours. But history is also a witness to the reality that those exercises have not been easy. There is the obvious temptation to put narrow self-interest above collective good. And that is why we need to rise to this particular challenge, because what is at stake cannot be overstated," he said.

ABHINANDAN MISHRA
NEW DELHI

EAM S. Jaishankar

India on Tuesday hosted the inaugural Trust & Safety India Festival (TASI) 2025 in New Delhi, bringing together policymakers, technology leaders, academics and civil society representatives from over 15 countries to discuss challenges and opportunities in building safer digital spaces.

The two-day forum was inaugurated by External Affairs Minister S. Jaishankar, and is jointly organised by the Centre for Social Research (CSR) and the Trust & Safety Forum. It is recognised as an official pre-event to the Government of India's AI Impact Summit 2026, scheduled for February next year. Addressing the gathering, Jaishankar said technology's "promise and perils have always been two sides of the same coin," and called for a balanced approach to AI governance with strong safeguards to protect citizens. He said India bears "special responsibility" as many nations, particularly in the Global South, look to it for leadership.

Discussions at the festival covered a range of issues including tackling online child sexual abuse material (CSAM), combating misinformation and deepfakes, supporting survivors of non-consensual intimate image sharing, ensuring youth digital well-being, and addressing scams and abuse in encrypted spaces.

Dr. Ranjana Kumari, Director of CSR and Chairperson of the Alliance for Trust and Safety, said the festival represents "a movement for shared accountability and collective action," highlighting India's role as the world's largest democracy in promoting equitable digital governance.

New Delhi [India], October 7 (ANI): External Affairs Minister S Jaishankar shared how India has been a consistent advocate for global Artificial Intelligence (AI) governance for global good, such as advancing the sustainable development goals and envisaging inclusive AI.

He made the remarks at the inaugural session of Trust and Safety India Festival 2025.

Jaishankar said, "We in India, we have consistently advocated for global AI governance and the shaping of an international agenda. We have demonstrated this during our G20 Presidency and strongly urged its usage for advancing Sustainable Development Goals, while safeguarding trust, safety, fairness and accountability. As a founding member of the Global Partnership on AI, we promoted the New Delhi Declarations which envisaged responsible and inclusive AI. We participated in the AI Summits in Bletchley Park and Seoul and co-chaired the Paris AI-Action Summit last year. The AI-Impact Summit in 2026 - with a focus obviously on impact - will take this forward."

Jaishankar also spoke about the concerns regarding AI, which revolve around bias, ethics, privacy and vulnerability. He encouraged the need for a global discourse and said that there is a need to rise to this particular challenge.

New Delhi [India], October 7 (ANI): External Affairs Minister S Jaishankar underlined the important role India plays in the global Artificial Intelligence landscape, noting that several countries, especially those from the Global South, look up to it for inspiration.

He made the remarks while speaking at the Trust and Safety India Festival 2025. As a pre-summit for February 2026 AI Impact Summit it kicks of conversations of interest for India and the world.

"India bears a special responsibility because many other nations - especially those of the Global South - they look to us for inspiration, and certainly in the case of the digital public infrastructure."

Highlighting the achievements of India in the last decade when one looks at the scale of delivery, improvement in governance, efficiencies with which public is served, the EAM noted that this is resonating across the world.

"As a Foreign Minister, when I go abroad, this is often the topic of conversation, and I can see very much, this being extrapolated into the world of AI as well", he said.

# India has special responsibility as Global South looks to us: Jaishankar

External Affairs Minister S Jaishankar underlined the important role India plays in the global Artificial Intelligence landscape, noting that several countries, especially those from the Global South, look up to it for inspiration.

He made the remarks while speaking at the Trust and Safety India Festival 2025. As a pre-summit for February 2026 AI Impact Summit it kicks of conversations of interest for India and the world.

"India bears a special responsibility because many other nations - especially those of the Global South - they look to us for inspiration, and certainly in the case of the digital public infrastructure."

# "India Bears Special Responsibility For Global South," Says Jaishankar

External Affairs Minister S. Jaishankar on Monday highlighted India's leadership in Artificial Intelligence (AI) governance, particularly for countries of the Global South, which increasingly look to India as an inspiration. He spoke at the Trust and Safety India Festival (Tasi) 2025, a pre-summit for the AI Impact Summit 2026, in New Delhi.

"India bears a special responsibility because many other nations – especially those of the Global South – look to us for inspiration, particularly in digital public infrastructure," Jaishankar said. He pointed to India's achievements over the past decade, including large-scale service delivery, improved governance, and efficient public systems, noting that these successes resonate globally.

The EAM warned that AI will transform economies, reshape work habits, deliver innovative health solutions, expand educational access, and redefine lifestyles. "This transformation will be all-pervasive, affecting every citizen across the globe. Along with new efficiencies, it will create new players and power centres," he said.

Jaishankar underscored that responsible AI governance requires a balanced approach, including effective safeguards to protect digital citizens. "For India, this means developing indigenous tools, self-assessment protocols for innovators, and establishing relevant guidelines," he said, quoting Prime Minister Narendra Modi: "Technology is a force for good, but only if humanity guides it."

New Delhi, Oct 7: External Affairs Minister (EAM) S. Jaishankar, addressing the inaugural session of the Trust and Safety India Festival (TASI) 2025, underscored the transformative potential of Artificial Intelligence (AI) while urging a balanced and responsible approach to its governance.

The event, held on Monday, served as a pre-summit gathering ahead of the AI Impact Summit scheduled for February 2026.

Speaking at the event, Jaishankar highlighted how technology has always shaped human progress but warned that its outcomes depend on the choices societies make.

"In human history, the advancement of progress has been determined by the march of technology. Yet, that has not always been a linear path. The promise and the perils have always been two sides of the same coin. Choices made in the deployment and application decided the difference between empowerment and exploitation, between democratisation and domination, and between partnership and polarisation," he said.

"Today, we are at the cusp of an immense change, and decisions made by us, individually and collectively, will help decide the fate of the foreseeable future," he said.

The EAM noted that AI, in the coming years, would profoundly transform economies, reshape work habits, create innovative health solutions, enhance access to education, improve efficiencies, and even redefine lifestyles.

# Jaishankar calls for implementation of ‘Responsible AI’

Talking about the future, the EAM said AI will transform economies in the next few years, change our work habits, create new health solutions, enhance educational access, improve efficiencies, and could even lead to a new lifestyle.

External Affairs Minister S Jaishankar on Tuesday observed that trust and safety are essential for the implementation of ”Responsible AI” and underlined that for a society like India, this means the development of indigenous tools and frameworks, self-assessment protocols for innovators, and establishing relevant guidelines.

”Only then can we be assured that the development, deployment, use, and governance of AI is safe and accessible,” he said in remarks at the ”Trust & Safety India Festival 2025”.

ट्रस्ट एंड सेफ्टी इंडिया फेस्टिवल 2025 के उद्घाटन सत्र को संबोधित करते हुए, विदेश मंत्री डॉ. एस. जयशंकर ने कहा, 'हम भारत में लगातार वैश्विक एआई शासन और एक अंतरराष्ट्रीय एजेंडा तैयार करने की वकालत करते रहे हैं। हमने अपने G-20 प्रेसीडेंसी के दौरान इसका प्रदर्शन किया है और विश्वास, सुरक्षा, निष्पक्षता और जवाबदेही को सुरक्षित रखते हुए सतत विकास लक्ष्यों को आगे बढ़ाने के लिए इसके उपयोग पर पुरजोर आग्रह किया है।'

विदेश मंत्री डॉ. एस. जयशंकर ने कहा कि 'भारत पर एक विशेष जिम्मेदारी है, क्योंकि वैश्विक दक्षिण के कई देश हमसे प्रेरणा लेते हैं।' उन्होंने यह बात मंगलवार को आयोजित 'ट्रस्ट एंड सेफ्टी इंडिया फेस्टिवल 2025' में कही। यह आयोजन फरवरी 2026 में होने वाले एआई इम्पैक्ट समिट की तैयारी का हिस्सा है, जिसमें कृत्रिम बुद्धिमत्ता यानी एआई के भविष्य पर वैश्विक चर्चा होगी। उन्होंने जयशंकर ने कहा कि भारत आज दुनिया में डिजिटल पब्लिक इन्फ्रास्ट्रक्चर का एक प्रेरणास्रोत बन चुका है, चाहे बात आधार, यूपीआई, या डिजिटल गवर्नेंस की हो। उन्होंने कहा कि भारत ने पिछले दस वर्षों में जिस पैमाने पर जनता तक सेवाएं पहुंचाई हैं और शासन में पारदर्शिता व दक्षता लाई है, वह दुनिया के लिए एक मिसाल बन गई है।

ट्रस्ट एंड सेफ्टी इंडिया फेस्टिवल 2025 में विदेश मंत्री एस जयशंकर ने AI पर वैश्विक शासन की वकालत की। उन्होंने कहा कि भारत ग्लोबल साउथ के लिए प्रेरणा बना है। उन्होंने जिम्मेदार एआई के लिए स्वदेशी टूल्स और ढांचे की जरूरत बताई। जयशंकर ने कहा कि डिजिटल पब्लिक इन्फ्रास्ट्रक्चर में भारत की सफलता दुनियाभर में चर्चा का विषय बन चुकी है।

विदेश मंत्री एस जयशंकर ने मंगलवार को भारत समेत दुनियाभर में कृत्रिम बुद्धिमत्ता (एआई) के बढ़ते उपयोग को लेकर अहम बातों पर चर्चा की। इस दौरान उन्होंने एआई के उपयोग से संबंधित मुद्दों से निपटने के लिए एक वैश्विक शासन संरचना की वकालत की। साथ ही एआई के जिम्मेदाराना उपयोग की आवश्यकता पर भी जोर दिया। उन्होंने कहा कि भारत वैश्विक आर्टिफिशियल इंटेलिजेंस (एआई) क्षेत्र में अहम भूमिका निभा रहा है। खासकर ग्लोबल साउथ (वैश्विक दक्षिण) के देश भारत को एक प्रेरणा के रूप में देखते हैं। जयशंकर ने दिल्ली में आयोजित ट्रस्ट एंड सेफ्टी इंडिया फेस्टिवल 2025 में कही, जो अगले साल फरवरी में भारत में होने वाले एआई इम्पैक्ट सम्मेलन से पहले की तैयारी बैठक थी।

# Jaishankar pitches for global AI governance

New Delhi, Oct 7 (PTI) External Affairs Minister S Jaishankar on Tuesday pitched for a global governance structure to deal with issues relating to the use of artificial intelligence (AI).

"Now, different societies have put different levels of emphasis on the benefits and on the risks of AI. Understandably, some of the narrative is influenced by those who have skin in the game," he said.

"But at the end of the day, it is imperative that we take a sober and we take a balanced view. After all, concerns about bias, ethics, privacy and vulnerability are well-founded, deriving from pre-existing experiences," he said.

The external affairs minister called for taking precaution against what he called the "danger of losing trust in institutions and practices that underpin our daily life".

# AI can transform lives but also deepen inequalities, cautions Jaishankar

External Affairs Minister S Jaishankar on Tuesday cautioned that the world stood "at the cusp of an immense change" driven by artificial intelligence, warning that while the technology could transform lives, it could also create "new power centres" and widen inequalities if not governed responsibly.

Speaking at the inaugural Trust and Safety India (TASI) Festival, 2025, a pre-summit event for next year's AI Impact Summit, Jaishankar said the choices made today would "determine the fate of the foreseeable future".

He called for balanced governance and adequate guardrails to ensure AI remains a force for empowerment rather than exploitation.

"AI will transform our economies, change our work habits, create new health solutions and enhance educational access. But it could also give rise to new players and new power centres," he said, echoing Prime Minister Narendra Modi's belief that technology is a force for good, provided humanity guides it.

| Awaz the Voice | Jaishankar discusses foreign policies with Vice President Radhakrishnan |

**External Affairs Minister S Jaishankar on Wednesday called on Vice President CP Radhakrishnan and held discussions on India's foreign policy, focusing on both opportunities and challenges shaping the country's global engagement.**

Sharing details of the meeting on X, Jaishankar said he was "honoured" to meet the Vice President and discuss key aspects of India's external relations. "Discussed the opportunities and challenges in our foreign policy. Look forward to his guidance and leadership as we take national development forward," the minister posted.

The meeting takes place at a time when India is continuing to expand its global footprint through strategic partnerships, economic diplomacy, and participation in multilateral forums. It also reflects the government's broader efforts to align foreign policy goals with domestic growth and development priorities.

Earlier on Tuesday, Jaishankar also underlined the important role India plays in the global Artificial Intelligence landscape, noting that several countries, especially those from the Global South, look up to it for inspiration.

# EAM Jaishankar Calls For Balanced Approach To AI, Says Trust And Safety Must Guide Innovation

**New Delhi:** External Affairs Minister (EAM) S. Jaishankar, addressing the inaugural session of the Trust and Safety India Festival (TASI) 2025, underscored the transformative potential of Artificial Intelligence (AI) while urging a balanced and responsible approach to its governance.

The event, held on Monday, served as a pre-summit gathering ahead of the AI Impact Summit scheduled for February 2026.

Speaking at the event, Jaishankar highlighted how technology has always shaped human progress but warned that its outcomes depend on the choices societies make.

# EAM Jaishankar Calls For Balanced Approach To AI, Says Trust And Safety Must Guide Innovation

New Delhi, Oct 7 (IANS) External Affairs Minister (EAM) S. Jaishankar, addressing the inaugural session of the Trus and Safety India Festival (TASI) 2025, underscored the transformative potential of Artificial Intelligence (AI) while urging a balanced and responsible approach to its governance.

The event, held on Monday, served as a pre-summit gathering ahead of the AI Impact Summit scheduled for February 2026.

Speaking at the event, Jaishankar highlighted how technology has always shaped human progress but warned that its outcomes depend on the choices societies make.

“In human history, the advancement of progress has been determined by the march of technology. Yet, that has not always been a linear path. The promise and the perils have always been two sides of the same coin. Choices made in the deployment and application decided the difference between empowerment and exploitation, between democratisation and domination, and between partnership and polarisation,” he said.

"India bears a special responsibility because many other nations - especially those of the Global South - they look to us for inspiration, and certainly in the case of the digital public infrastructure."

Highlighting the achievements of India in the last decade when one looks at the scale of delivery, improvement in governance, efficiencies with which public is served, the EAM noted that this is resonating across the world.

"As a Foreign Minister, when I go abroad, this is often the topic of conversation, and I can see very much, this being extrapolated into the world of AI as well", he said.

He made the remarks at the inaugural session of Trust and Safety India Festival 2025.

Jaishankar said, "We in India, we have consistently advocated for global AI governance and the shaping of an international agenda. We have demonstrated this during our G20 Presidency and strongly urged its usage for advancing Sustainable Development Goals, while safeguarding trust, safety, fairness and accountability. As a founding member of the Global Partnership on AI, we promoted the New Delhi Declarations which envisaged responsible and inclusive AI. We participated in the AI Summits in Bletchley Park and Seoul and co-chaired the Paris AI-Action Summit last year. The AI-Impact Summit in 2026 - with a focus obviously on impact - will take this forward."

## External affairs minister S Jaishankar pitches for global AI governance

External Affairs Minister S Jaishankar on Tuesday pitched for a global governance structure to deal with issues relating to the use of artificial intelligence (AI).
Addressing an event, Jaishankar underlined the need for responsible use of AI and argued that for a country like India, it means the development of indigenous tools, self-assessment protocols for innovators and establishing relevant guidelines.

# EAM's remarks at Trust & Safety India Festival 2025 (October 07, 2025)

October 07, 2025

**Dr. Ranjana Kumari ji,**

**Friends,**

It is a great pleasure to join you all this morning as we commence the Trust and Safety India (TASI) Festival. As a pre-Summit event for the February 2026 AI Impact Summit, it kicks off a set of conversations that are of great interest both in India and to the world. I commend the Centre for Social Research India and you, Dr. Ranjana Kumari ji personally, for taking this initiative.

2. Friends, in human history, the advancement of progress has been determined by the march of technology. Yet, that has not always been a linear path. The promise and the perils have always been two sides of the same coin. Choices made in the deployment and application decided the difference between empowerment and exploitation, between democratization and domination and between partnership and polarization. Today, we are at the cusp of an immense change and decisions made by us, individually and collectively, will help decide the fate of foreseeable future.

3. Now, if any of you think that this is an exaggeration, consider what is likely to happen in just the next few years. AI will transform our economies, it will change our work habits, it will create new health solutions, it will enhance educational access, it will improve efficiencies and it could even lead to a new lifestyle. The difference with the past is that this particular transformation that is going to come upon us – this will be all-pervasive and not just sectoral. It will impact every citizen in every corner of the world. New efficiencies and new possibilities will certainly emerge; but so too will new players and new power centres. For this very reason, we need to adopt a balanced approach to the governance of AI and to ensure that there are adequate guardrails in place to protect digital nagriks. As Prime Minister Narendra Modi has noted: "Technology is a force for good, but only if humanity guides it".

## DR S. JAISHANKAR HIGHLIGHTS INDIA'S COMMITMENT TO TRUSTED AND ACCOUNTABLE AI GOVERNANCE AT TRUST AND SAFETY INDIA FESTIVAL 2025

External Affairs Minister Dr S Jaishankar addresses the inaugural session of Trust and Safety India Festival 2025. He highlighted the all – pervasive and transformative impact of Artificial Intelligence. And India's efforts in fostering AI governance based in trust, safety, fairness and accountability.

He commended the Centre for Social Research India and Dr. Ranjana Kumari for taking this initiative, calling it "a timely and necessary platform for a global dialogue on the future of AI governance."

Dr. Jaishankar said that in human history, "the advancement of progress has been determined by the march of technology," but warned that "the promise and the perils have always been two sides of the same coin." He reflected on how technology can either empower or exploit, democratize or dominate, depending on how it is used. "Today, we are at the cusp of an immense change, and decisions made by us, individually and collectively, will help decide the fate of the foreseeable future," he stated.

Discussing the impact of Artificial Intelligence, Dr. Jaishankar said, "AI will transform our economies, it will change our work habits, create new health solutions, enhance educational access, and improve efficiencies. It could even lead to a new lifestyle." He cautioned, however, that this transformation "will be all-pervasive and not just sectoral," affecting "every citizen in every corner of the world." He emphasized the need for balanced governance, noting that "we must ensure adequate guardrails to protect digital nagriks." Quoting Prime Minister Narendra Modi, he added, "Technology is a force for good, but only if humanity guides it."

"Trust and Safety are essential for the implementation of Responsible AI," Dr. Jaishankar asserted. He said India must focus on developing "indigenous tools and frameworks, self-assessment protocols for innovators and relevant guidelines" to ensure safe and accessible AI systems. Highlighting India's leadership in digital public infrastructure, he said, "Many nations, especially those of the Global South, look to us for inspiration. The scale of delivery and efficiency we've achieved in the last decade is already resonating across the world."
